RESPONSE TO RESTRICTION REQUIREMENT
UNDER 35 U.S.C. § 121

Sir:

The present communication is responsive to an Office Action dated September 24, 2004 in the above-captioned application (the "Application") requiring a restriction of the claims submitted for examination.

Claims 1-32 are currently pending in the Application. In the Office Action, it was asserted that the Application contains claims which are directed to two distinct inventions.

As a result, the Examiner issued a Restriction Requirement requiring the election of a single group of claims for prosecution. The claims, as grouped by the Examiner, appear as follows:

- Group I: Claims 1-31, drawn to a method of making an electro-active lens, classified in class 351, subclass 177.
- Group II: Claim 32, drawn to an electro-active lens, classified in class 351, subclass 159.

In the event that Applicants elect the claims of Group I, the Examiner has required the Applicants to select a single disclosed species for examination. The Examiner has asserted that Group I contains claims directed to two patentably distinct species: Group Ia, claims 1-30, directed to a species of method of making an electro-active lens having a covering layer formed over a lens blank containing an electro-active element and Group Ib, claim 31, directed to a species of method of making an electro-active lens having a lens blank formed around an electro-active element and a conductive bus.

Applicants respectfully traverse the restriction requirement.

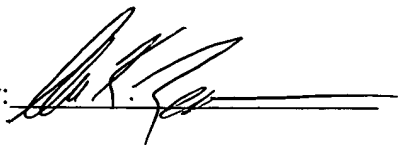

Applicants submit that the claims of the designated groups have not necessarily acquired a separate status in the art for examination purposes, notwithstanding possible different art classifications which may have been artificially assigned thereto in the Patent Office. Art very relevant to the patentability of one group might logically be found in the art classes assigned to one of all of the other claim groups. The classification cited in support of the election requirement is merely used for cataloging purposes and is not conclusive of the propriety of such a requirement.

Furthermore, under the patent statute, 35 U.S.C. § 121, an application may be properly required to be restricted to one of two or more claimed inventions, only if they are able to support separate patents and they are either independent or distinct. 37 C.F.R. § 1.141; MPEP 803. However, if the search and examination of an entire application can be made without serious burden, then the examiner must examine it on the merits, even if it includes claims to distinct or independent inventions. MPEP 803. Applicants respectfully submit that given the overlapping subject matter of the claims of Group I, claim 31 could be examined together with claims 1-30 with little additional burden on the Examiner.

Notwithstanding the above, in order to comply with the Restriction Requirement, Applicants elect with traverse, the claims of Group I for further prosecution and further elect to prosecute the species identified by the Examiner as Group Ia, claims 1-30. Applicants request that the remaining claims be held in abeyance under provisions of 37 C.F.R. § 1.142(b) until final disposition of the elected claims.

Date: October 13, 2004

Respectfully submitted,

By:
